Pure Green Coffee Harnesses The Weight-Loss Effects Of The Purest Extract From Green Coffee Beans

Consumer (Women's Health) - The Green Coffee Bean Extract is the latest buzz in the "battle of the bulge". With millions of people praising this so called "miracle pill" that you take as a supplement to lose weight, it has been getting a lot of attention since it was recently featured on The Dr. Oz Show. Surprisingly, many people who struggle daily with their weight have yet to hear about this powerful option. Those that have heard of the green coffee bean diet are confused about what it is, how to use it and how to avoid falling for ineffective formulas and downright scams.

According to Dr Lindsey (The guest host on the popular Dr Oz show) **Green Coffee Extract** works in more than one way, "The first way is it goes in and causes the body to burn glucose, or sugar, and burn fat, mainly in the liver...The second way, the most important way, is it slows the release of sugar into the blood stream. So when you don't have sugar building up in the blood stream, you don't have fat building up because sugar turns to fat...When the two are combined together, you get this synergistic effect that basically burns and blocks and stops fat, but it also is natural and safe."

Well, we here at Consumer Lifestyles were a little skeptical of this **Green Coffee Bean Extract**. Even after pouring through mountains of research. While I had an educated opinion, I still had no personal proof that the **Green Coffee Bean** option was worth the time. So, with my editors blessing, I decided to go out and put the product to the test myself. What better way to find out the truth than to conduct my own study?

Health and Diet writer, Helen Hasman recently put the Green Coffee Bean Diet to the test. And the results were surprising:

She lost 27 lbs in 9 weeks, with No Special Diet, and No Exercise

The benefits of the Green Coffee Bean beat all of our initial skepticism. We found the diet not only helped with weight loss and getting rid of belly fat, but it seemed to boost energy levels, and also helped Jennifer sleep better and to wake-up more rested.

Well, we here at Consumer Lifestyles were a little skeptical of this **Green Coffee Bean Extract**. Even after pouring through mountains of research. While I had an educated opinion, I still had no personal proof that the **Green Coffee Bean** option was worth the time. So, with my editors blessing, I decided to go out and put the product to the test myself. What better way to find out the truth than to conduct my own study?

To get started, I volunteered to be the guinea pig. I applied online for a bottle of **Pure Green Coffee**. Pure Green Coffee is one of the most credible and trustworthy diet supplement suppliers on the market. It included a 100% Money Back Guarantee of the product and it did not try to fool me into agreeing to additional hidden offers. Another reason why I chose **Pure Green Coffee** is because it is the most concentrated and purest Green Coffee on the market. This would give me the most accurate results for my test.

My Results

WEEK 1

After one week on the diet using both products I was surprised at the dramatic results. My energy level was up, and I wasn't even hungry, an apparent side effect of the green coffee extract which curbs the appetite.

I honestly felt fantastic!

And I didn't even change anything about my daily routine. On day 7 I got on the scale and couldn't believe my eyes. I had lost 5 lbs. But I still wasn't convinced as they say you lose a lot of water at the beginning of any diet. I wanted to wait and see the results in the upcoming weeks. But it sure was looking up! I now weighed under 140 lbs for the first time in years!

I'm very glad you did research on the suppliers of these products because most of the products out there are shams. I went ahead and ordered the exact brands you recommended on this article, and I can't wait to try it.
